

Installation & Assembly

Strip Kit (16", 32", 96")

Warning: Due to sheet metal edges, Wall Control strongly recommends the use of gloves while installing metal pegboard panels, strips, and rails.

8ft (96") Installation

Mount Qty (6) 16" Strips Side-by-Side for 96" Total Width

Accepts 1/4" traditional pegs & Wall Control single-row slotted hooks (Not Included)

2.6ft (32") Installation

Mount Qty (2) 16" Strips Side-by-Side for 32" Total Width

Accepts 1/4" traditional pegs & Wall Control single-row slotted hooks (Not Included)

1.3ft (16") Installation

Mount Qty (1) 16" Strip for 16" Total Width

Accepts 1/4" traditional pegs & Wall Control single-row slotted hooks (Not Included)

Strip Mounting Instructions

1. It is preferred to mount strips into studs or solid surfaces if available. To do so, simply mark the hole locations on the wall and then drill 1/8" dia pilot holes at the hole locations to accommodate the provided mounting screws. **For use with Wall Control single row engaging hooks, be sure slots are vertical.**

2. If a stud or solid framing cannot be located, mark the hole position and drill a 1/4" hole to accommodate the anchor provided.

Quick Tip: Stripping out the mounting holes in drywall with the screws included creates a perfect sized hole to hammer the provided anchors into place

Warning: Do not over tighten mounting screws or risk damaging the panel face

Product Suggestion: Although strips and rails are sold in kits, such as the **8 ft Strip Kit**, the strips can be placed in different locations to maximize storage in multiple locations and rooms. For example, with the "8 ft Strip Kit" you might use 3 strips in one room, 2 on a workbench face, and 1 in a kitchen to hold keys. Although all six strips included combine for 8 ft of total space, that space might be better served in pieces throughout your home or workplace.
